Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 29 April 2004, with respect to the rejection(s) of claims 9 and 10 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Oross et al., (hereinafter Oross), US 6,757,002 B1.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 9 and 10 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Oross.

With respect to claim 9 Oross discloses an input control system 10 (FIGS. 1-2) comprising an input pad 34 having a coordinate input portion 16 and at least four switches 18 and 38a-38d; each of the switches capable being in ON or OFF states (when touched-untouched by a user's finger); wherein a finger is slid across the input pad to input information for moving a pointer in a screen (col. 4, line 62 – col. 5, line 17), and is tapped to perform selection operation (col. 5, lines 57-61); wherein the four switches comprise default operations, such as left-click and right-click mouse operations (col. 4, lines 13-18) and a scroll-up and scroll-down operation, when the switches are in ON state (col. 7, lines 20-34), and wherein the default operation for

each of the four switches is changeable to a different operation by setting commands generated in a switch input section driver (col. 7, line 47 – col. 8, line 17).

As to claim 10 Oross further teaches that changing of the default operation for each switch is performed by a switching operation that is displayed on the screen (FIG. 15) and that the switching operation is specifically adapted to permit the setting or modification of the operation of each of the switches (col. 11, lines 25-35).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ho et al., US 5,883,619, discloses a mouse with addition control keys for scrolling.

Rauscher, DE 19500033 A1, discloses a keyboard with integrated mouse (FIG. 1) having scrolling keys in addition to mouse left-click and right-click buttons.

Kubo, JP 11-039092, discloses a mouse with additional scrolling buttons.

Sakai, JP 02-306329, discloses a mouse with additional scrolling keys.
